

## MOOSE Guide

Learn the Moose technique and perfect your skills for a brilliant 'drop punt'

### Step 1: The Set up

Place your **MOOSE** on level ground with arrows facing the target.  
Rest the ball upright on the Antlers; tilt slightly forward if preferred.  
The seam of the ball should face the target.

#### Ball

Contact point

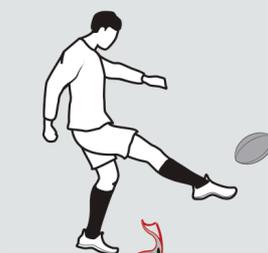

#### Boot

Contact point

### Step 2: Practice Standing Kick\*

Plant your non-kicking foot beside the **MOOSE**.  
Kick straight through with the top half of your boot laces meeting the ball as shown.  
Practice until you feel the connection of a well hit drop punt.

### Step 3: Run-up Kick\*

Take 3-4 steps back directly behind the ball.  
Head down eyes on the ball, run-in and be certain to kick through the ball.  
Aim for a lower ball flight. A well-hit ball off the **MOOSE** will gain good height, distance and incredible accuracy.

*Practice makes perfect. Kick it straight.*

\* Wearing shoes is recommended.

#### CONTENTS

2 Antlers + 2 Bridges

Narrow  
Broad

Suits smaller ball. Provides higher ball position.  
Suits larger ball. Provides lower ball position.

#### TO CONSTRUCT MOOSE

Select a bridge, slide both antlers on until you hear them click.  
If compact storage is needed - dismantle again after use.
